This document contains final disclosure of the results of the C The template contains the bank's overall Comprehensive Asse e Assessment erne, as well as further detail on Asset Quality Review (AQR) results ats to consider within the context of final results

This page letail on how to read the temp Bank-specific notes

Main Results A. Key information on the bank before the Comprehensive Assessment (31 December 2020) B. The main results of the Comprehensive Assessment C. Major capital measures impacting Tier 1 eligible capital, from 01 January 2021 to 30 April 2022 Detailed AQR Results
D. Matrix Breakdown of Asset Quality Indicators
F. Leverage ratio impact of the Comprehensive Assessment

Section	Contents	Key fields	Notes
A. Main Information on the bank before the Comprehensive Assessment (31 December 2020)	This section contains information on the size, performanc and starting point capital holding of the bank as of 31 December 2020	e A6 Starting point CET 1% - bank provided starting point for any adjustments following the Comprehensive Assessment	- Numbers in this section are provided permany for transparency purposes and should not be used for comparisons to other sections/balls. As an example, the NFE ratio exhibited in this section applies across all segments and all bark portfolios, and as such does not provide a like for like comparison with the NFE ratio data displayed in section E (which relates only to portfolios selected in Phase 1 of the AOR)
B. Main results of the Comprehensive Assessment	This key section of the disclosure template contains the main results of the Comprehensive Assessment	Key fields discussed in more detail below	
C. Major capital measures impacting Tier 1 eligible capital, from 01 January 2021 to 30 April 2022	This section displays major capital market activity affecting Tier 1 eligible capital		 - Section C doubt he read as informational only. Figures here do not feed into the flual CET1% results as detailed in section B, nor of the direct methods and the section B, nor of the direct methods. - For tarks with a capital shortful, this information will be taken into account during the capital planning phase that follows disclosure of Comprehensive Assessment results.
D. Maltrix Breakdown of AOR Result	This section gives workblock specific AQR results	D.A. D.F provides ARR results related to accruate accounted assets broken down by asset segment and AQR workblock D.G Di provides the results of the mellow of fair value exposures D21 shows the gross capital impact of the AQR before offsetting effects D26 shows the net total impact of the AQR on the CET1 ratio	 The solution of asset classes for portfolio review was based on an approach aimed at identifying those portfolios with the highlight of molecular to the molecular of microbiaditic and microbiaditic methods, astrophotol and the solution of the additional stand-point. In the AGR enters ab metality increase in provisions (from a spenvisory perspective) are transitied into a durage in CET1 Intern D'I to D'I are before officiting impacts such as east protection and taxes
E. Matrix Breakdown of Asset Quality Indicators	The section provides asset quality indicators (NPE levels and coverage ratio), broken down by asset segment	E1 shows the evolution of NPE levels for portfolios selected in Phase 1 E10 shows the evolution of coverage ratios for portfolios selected in Phase 1	 Information reported only for portfolios subject to detailed review in AGR. I.e. those selected in Phase 1 of the AGR Figures presented should not be interpreted as accounting figures
F. Leverage ratio impact of the Comprehensive Assessment	This shows the change in the leverage ratio from the AQR		 Leverage ratios are not binding based on the current regulatory framework, are displayed for information purposes only and have no impact on the capital shortfall Due to the 'table cablence sheet' assumption used as part of the Shees Test, the leverage ratio might be misleading for the Shress Test and is therefore displayed for AAR only

2. Detailed AQR Results				

D. Matrix Breakdown of AQR Result (B2)

Note: • The selection of asset classes for portfolio review was based on an approach aimed at identifying portfolios with the highest risk of misclassification. Therefore, extrapolation of results to the non-selected portfolios would not be appropriate. • The selection ms D.C to D.F include (but are not limited b) any impacts on provisioning associated with the reclassification (from a supervisory perspective) of exposures across stages of the IFRS 9 impairment model. • In the AQR exercise the resulting increase in provisions (from a supervisory perspective) are translated into a change in CET1 capital. • In the AQR exercise the resulting increase in provisions (from a supervisory perspective) are translated into a change in CET1 capital. • Items D to 102 are before offesting impacts such as asset protection, taxes and IFRS9 transitional arrangements. • Basis points are calculated using total risk exposure from Section A4. • For the interpretation of the detailed results the interested reader may refer to the AQR manual outlining the methodology: https://www.bankingsupervision.europa.eu/ec/bjub/pdf/ssm.assetqualityreviewmanual201806.en.pdf

E. Matrix Breakdown of Asset Quality Indicators

Note:

The selection of asset classes for portfolio review was based on an approach aimed at identifying those portfolios with the highest risk of misclassification. Therefore, extrapolation of results to the non-selected portfolios would not be appropriate.
 Changes in non-performing exposure as a result of the AQR reflect reclassification of exposures (from a supervisory perspective) into stage 3 of the IFRS 9 impairment model (see Section 4.5.2, Asset Quality Review Phase 2 Manual).

Information reported only for portfolios subject to detailed review in AQR

F. LEVERAGE RATIO IMPACT OF THE COMPREHENSIVE ASSESSMENT

Note:

Note that the leverage ratio is calculated based on the COMMISSION DELEGATED REGULATION (EU) 2015/62 of 10 October 2014 amending Regulation (EU) No 575/2013 of the European Parliament and of the Council
 It is not binding based on the applicable regulatory framework as of the reference date, it is displayed for information purposes only and has no impact on the capital shortfall (B11).
 As the constant balance sheet assumption, which is applied in the Stress Test, might be misleading for the leverage ratio, the ratio is displayed for AQR only.

F1	Leverage Ratio at end-year 2020	%	13.10%
	Please refer to Definitions and Explanations sheet		
	F1 = A9		
F2	Aggregated adjustments to Leverage Ratio due to the outcome of the AQR	Basis Points	-6
	F2 = D25 / A5		
F3	AQR adjusted Leverage Ratio	%	13.04%
	F3 = F1 + F2		

		DEFINITIONS & EXPLANATIONS					
Reference	Name	Definition or further explanation					
Keleience	Name						
MAIN INFORMATION ON THE BANK BEFORE THE COMPREHENSIVE ASSESSMENT (31 December 2020)							
A1	Total Assets (based on prudential scope of consolidation)	Sum of on balance positions. Note that for this and all following positions the scope of consolidation follows Article 18 CRR (therefore direct comparison with financial accounts based on accounting scope of consolidation will result in differences). 31 December 2020.					
A2	Net (+) Profit/ (-) Loss of 2020 (based on prudential scope of consolidation)	Net profits (positive number) or net losses (negative number) as of 31 December 2020. After taxes. Excludes Other Comprehensive Income. The scope of consolidation follows Article 18 CRR (therefore direct comparison with financial accounts based on accounting scope of consolidation will result in differences).					
A3	Common Equity Tier 1 Capital	As of 31 December 2020, according to CRD IV/CRR definition (Article 50 CRR) including transitional arrangements as of 31.12.2020.					
A4	Total risk exposure	According to CRD IV/CRR definition (Article 92.3 CRR), "total RWA", as of 31 December 2020 including transitional arrangements as of 31.12.2020.					
A5	Total exposure measure used in leverage ratio	Denominator of leverage ratio (A9), "leverage exposure", according to COMMISSION DELEGATED REGULATION (EU) 2015/62 of 10 October 2014 amending Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to the leverage ratio.					
A6 A9	CET1 ratio Leverage ratio as of 31 December 2020	A6+A3/A4, Article 922a CRR, figures as of 31 December 2020. Leverage ratio as of 31 December 2020 according to COMMISSION DELEGATED REGULATION (EU) 2015/62 of 10 October 2014 amending Regulation (EU) No 575/2013 of the European Parliament and of the Council with read to the leverage ratio					
		Numerator: Exposure that is non-performing according to NPE definition set forth in the EBA final draft ITS on supervisory reporting on forbearance and non-performing exposures under Article 99(4) of Regulation (EU) No					
A10	Non-performing exposures ratio	575/2013. Note that all exposures classified as "Stage 3" under the IFRS 9 impairment model are considered NPE for the purposes of CA following the above definition. Denominator:					
		Total exposure (performing and non-performing), book value plus off-balance exposure weighted by Credit Conversion Factor. As of 31 December 2020 and total of consolidated bank					
		Numerator: Los allowances for expected credit losses as per IFRS9(5.5)					
A11	Coverage ratio for non-performing exposure	Denominator:					
		Non-performing exposure (numerator of A10) As of 31 December 2020 and total of consolidated bank.					
		Level 3 assets according to IFRS 13, para. 86-90					
A12	Level 3 instruments on total assets	Not defined for banks using nGAAP. Total assets = A1					
B. MAIN RESULTS OF THE COMPREHENSIVE ASSESSMENT (C	2A)						
B1	CET1 Ratio	81=A6 Burn of all ADB coulds imposition the CET4 ratio. A broaddawn is provided in the sheet "Patalled ADB Boolite" in back relation control offset					
83	Aggregated adjustments due to the outcome of the AQR AQR adjusted CET1 Ratio	Sum of all AQR results impacting the CET1 ratio. A breakdown is provided in the sheet "Detailed AQR Results". In basis points, marginal effect. B3 = B1 + B2					
84	AQR adjusted CE11 Ratio Aggregate adjustments due to the outcome of the baseline scenario of the Stress	based on CRD IV/CRR definition including transitional arrangements as of 31.12.2020. Additional adjustments due to Resealing Scenario to Invest control lawel near the 3-user neriod					
	Test	Additional adjustments due to Baseline Scenario to lowest capital level over the 3-year period. 85= 84 + 83					
85	Adjusted CET1 Ratio after Baseline Scenario Aggregate adjustments due to the outcome of the adverse scenario of the Stress	Note that this is an estimate of the outcome of a hypothetical scenario and refers to a future point in time. It should not be confused with the bank's forecast or multi-year plan.					
86	Test	Additional adjustments due to Adverse Scenario to lowest lowest hypothetical CET1 ratio in the three years considered B7 = B5 + B6					
B7	Adjusted CET1 Ratio after Adverse Scenario Shortfall to threshold of 8% for AOR adjusted CET1 Ratio	D/ = 0.7 × 00 Note that this is an estimate of the outcome of an adverse hypothetical scenario and refers to a future point in time. It should not be confused with the bank's forecast or multi-year plan. B8 = (8-B3) * 100 (if B3-8, otherwise 0)					
B9	Shortfall to threshold of 8% in Baseline Scenario	B9 = (8 - B5) * 100 (if B5<8, otherwise 0)					
B10 B11	Shortfall to threshold of 5.5% in Adverse Scenario Aggregated Capital Shortfall of the Comprehensive Assessment after adjustments	B10 = (5.5 - B7) * 100 (if B7<5.5, otherwise 0) Agregated Capital Shortfall of the Comprehensive Assessment after adjustments (see Press Release)					
C. Memorandum Items	Raising of capital instruments / retained earnings eligible as CET1 capital (+)	Changes to CET1 due to new issuances of common equity / relained earnings					
C2	Repayment of CET1 capital, buybacks (-)	Changes to CET 1 due to new southos or common equity / retained earnings Changes to CET1 due to repayment or reduction of CET1 (i.e. buybacks).					
C3	Conversion to CET1 of existing hybrid instruments becoming effective between January 2021 and April 2022 (+)	Changes to CET1 due to conversion of existing hybrid instruments into CET1 which took place between 01 January 2021 and 30 April 2022.					
C4	Net Issuance of Additional Tier 1 Instruments with a trigger at or above 5.5% and below 6%	Net issuance of AT1 Instruments (Article 52 CRR) with a trigger at or above 5.5% and below 6% between 01 January 2021 and 30 April 2022, expressed in terms of RWA. AT1 instruments which have been converted into CET1 are not to be accounted for in this cell to avoid double counting with C3.					
C5	Net Issuance of Additional Tier 1 Instruments with a trigger at or above 6% and below 7%	Net issuance of AT1 Instruments (Article 52 CRR) with a trigger at or above 6% and below 7% between 01 January 2021 and 30 April 2022, expressed in terms of RWA. AT1 instruments which have been converted into CET1 are not to be accounted for in this cell to avoid double counting with C3.					
C6	Net Issuance of Additional Tier 1 Instruments with a trigger at or above 7%	Net issuance of AT1 Instruments (Article 52 CRR) with a trigger at or above 7% CET1 between 01 January 2021 and 30 April 2022, expressed in terms of RWA. AT1 instruments which have been converted into CET1 are not to be accounted for in this cell to avoid double counting with C3.					
D. Matrix Breakdown of AQR Result							
Asset class	Corporates	Asset class is an aggregated of the AQR sub-asset classes Project finance, Shipping, Aviation, Commercial real estate (CRE), Other real estate, Large corporates (non real estate) and Large SME (non real estate).					
D.A D.B	Credit Risk RWA as of 31 December 2020 Portfolio selected Adjustments to provisions	Total credit risk weighted assets including off balance sheet items. Indication of the fraction of the overall RWA per asset class that was selected in Phase 1 of the AQR. Anount of adjustments to specific provisions on the credit file samples.					
D.C.	on sampled files Adjustments to provisions due to	Initial or adjustments to applications for an or cellular at samples. This includes all first from the single cellular field file review Amount of adjustments to specific provisions based on the projection of findings of the credit file review to the wider portfolio (negative numbers).					
D.E	projection of findings Adjustment to provisions due	Amount of adjustments to collective provisions as determined based on the challenger model in cases where the bank's collective provisioning model is found to be out of line with the standards expressed in the					
D.F	to collective provisioning review Adjustments on CET1 before offsetting impact	AQR Manual. Gross amount of the aggregated adjustments disclosed in D.C - D.E before the offsetting impact of risk protection and tax (negative numbers).					
D.G	Portfolio size Carrying Amount	Portfolio size - Carrying Amount					
D.H	Portfolio selection	Indication of the carrying amount (gross mark-to-market as of 31 December 2020, before AQR adjustment) of positions that have been reviewed by Bank Team divided by total carrying amount (gross mark-to- market as of 31 December 2020, before AQR adjustment and before PP8A) for this asset class.					
D .I	Adjustments on CET1 before offsetting impact	Amount of adjustments resulting from: - CVA Challenger model (D11), the different executive of the value executive residence (D12 D10), as well as the fair value residence as whole (D12).					
D10	Additional information on portfolios with largest adjustments accounting for (at least						
D11	30% of total banking book AQR adjustment: FVA and AVA adjustments Gross impact on capital	Note this adjustment is already reflected in the asset class break down of D1 to D9 and displayed here only on a more granular leve FVA and AVA adjustments resulting from the level 3 Fair Value Exposures Review (additional valuation adjustments as per CRR Art 105 and EBA RTS on Prudent Valuation) Sum of DF1 and D111					
D21 D22	Offsetting impact due to risk protection	Gross amount of the aggregated CET1 adjustment based on the AQR before offsetting impact of asset protection, insurance, tax (negative number) and IFR59 transitional arrangements. Abarceasted estimated impact of asset protections schemes (e.g. oxfordio ouranteest) and insurance effects that may apoly to apolicable portfolios (positive number).					
D23 D24	Offsetting tax impact Offsetting IFRS9 transitional arrangement impact	The offsetting tax impact includes the assumed creation of DTAs, which accounts for limitations imposed by accounting rules. Appropriate CRR IV DTA deductions are made for any tax offsets. Includes the offsetting impact of transitional arrangements for mitigating the impact of the introduction of IFRS 9 as per Regulation (EU) 20172395 of the European Parliament and of					
D25	Offsetting IFRS9 transitional arrangement impact Net impact on capital	the Council of 12 December 2017. Calculated as per AQR Manual Chapter 9.5. Net amount of the aggregated adjustment to CET1 capital based on the AQR after offsetting impact of risk protection, tax and IFRS9 transitional arrangements. Sums the impact from D20, D21, D22 and D23.					
D26	Net total impact of AQR results on CET1 ratio (incl RWA effects)	Net change in the CET1 ratio resulting from the AQR reflecting the effect of the total adjustments to capital (D25) and adjustments to risk-weighted assets					
E. Natio Development & South Contractor		1					
 According to paragraph 145 of Annex V of the EBA ITS on supervisory i 	on (see Section 2.4.4. of the AQR Phase 2 manual): raft ITS on supervisory reporting on forbearance and non-performing exposures under reporting. NPEs are those that satisfy either or both of the following citteria:	Article 99(4) of Regulation (EU) No 575/2013.					
- material exposures which are more than 90 days past due; - the debtor is assessed as unlikely to pay its credit obligations in full wi The definition of NPEs is therefore based on the "past due" criterion and The figures presented should not be understood as accounting figu	ithout realisation of collateral, regardless of the existence of any past-due amount or of the "unlikely to pay" criterion. Note that all debtors classified as Stage 3 by the bank an res .	the number of days past due. also considered NPE following the above definition.					
E A	Unadjusted NPE Level 31 December 2020	Total NPE for all portfolios in-scope for detailed review during the AQR. Expressed as a percentage of Total Exposure for these portfolios.					
E.B E.C	Changes due to the single credit file review Changes due to the projection of findings	Exposure re-classified from performing to non-performing according to the CFR classification review. Exposure re-classified from performing to non-performing according to the projection of findings. Numerator:					
E.D	AQR - adjusted NPE level	Exposure reported by the bank as non-performing according to the EBA NPE definition (see AQP Phase 2 Manual Section 2.4.4, and explanation for A10 above) as of 31 December 2020 + Exposure re-classified from performing to non-performing according to the CFR classification review and projection of findings.					
		Denominator: Total exosure (serformino and non-performino). Same exosure definition as above Security and the security of the					
E.E E.F	ratio of non-performing exposure, 31 December 2020 Changes due to the single credit file review	Specific provisions divided by non-performing exposure for portfolios in-scope for detailed review in the AQR.
