- The columns D.C to D .F include (but are not limited to) any impacts on provisioning associated with the reclassification (from a supervisory perspective) of exposures across stages of the IFRS 9 impairment model. • In the AQR exercise the resulting increase in provisions (from a supervisory perspective) are translated into a change in CET1 capital.
- Items D1 to D20 are before offsetting impacts such as asset protection and taxes.
- Basis points are calculated using Total Risk Exposure Amount from Section A4. • For the interpretation of the detailed results, the interested reader may refer to the AQR manual outlining the methodology: https://www.bankingsupervision.europa.eu/ecb/pub/pdf/ssm.assetqualityreviewmanual202305~061b0b5fd0.en.pdf
