Liquidity					
Liquidity coverage ratio	145.93%	146.47%	165.41%	170.83%	171.78%

Source: ECB.

¹⁾ Up to the end of the reference period Q4 2019, the tables showing information on the liquidity coverage ratio were derived by aggregating data from stand-alone entities and from banking groups where the ultimate EU parent is within the SSM. As of the reference period Q1 2020, the liquidity sample matches the full sample.

²⁾ CET1, Tier 1 and total capital ratios are based on the transitional provisions laid down in Articles 465 to 491 of Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms (the Capital Requirements Regulation).

³⁾ The Level 1, 2 and 3 asset categories include only financial instruments measured at fair value.

T01.01 Significant institutions by country and classification

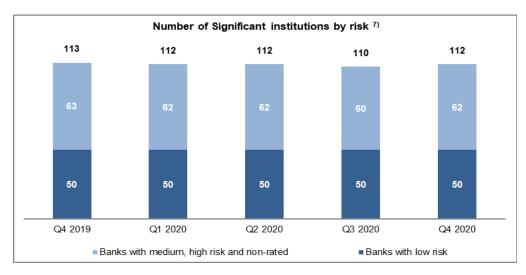

(number of institutions)

Country	Q4 2020
Belgium	6
Bulgaria	1
Germany	21
Estonia	3
Ireland	6
Greece	4
Spain	12
France	11

G-SIBs 2)	8
Retail and consumer credit lenders	16
Small market lenders	13
Universal and investment banks	18
Not classified	-
Total	112

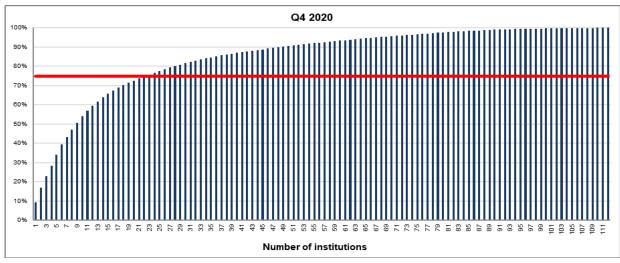

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis, and mergers and acquisitions.

- 1) There are no significant institutions at the highest level of consolidation in Croatia and Slovakia.
- 2) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs as published by the Financial Stability Board.
- 3) Domestic exposures more than 95% of total debt securities and loans and advances.
- 4) Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).
- 5) European countries not in the EEA.
- 6) RoW: rest of the world, i.e. all countries except European countries.
- 7) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

T01.02 Concentration of total assets

(cumulative percentages of total assets)

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

The charts show the cumulative percentage of the total assets in the sample which is covered when the total assets of each institution, ordered from the largest to the smallest, are added. For instance, it is shown that the largest institution in the sample accounts for almost 10% and the 20 largest institutions represent approximately 75% of the total assets in the sample. The solid line in red corresponds to the 75th percentile.

T02.01.1 Profit and loss figures by reference period

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. Specifically, there are 113 in the fourth quarter of 2019, 112 in the first and second quarter of 2020, 110 in the third quarter of 2020 and 112 in the fourth quarter of 2020. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis, and mergers and acquisitions.

- 1) Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.
- 2) Figures reported are year-to-date.
- 3) This includes, among other items, gains or losses resulting from the valuation of financial assets/liabilities at fair value, where those financial assets/liabilities are not reported as "held for trading".
- 4) Operating income before administrative expenses and depreciation are deducted.
- 5) Provisions include provisions for "commitments and guarantees given" and "other provisions".
- 6) Profit and loss before tax from continued operations (i.e. "net income before impairment, provisions and taxes" + "impairment and provisions" + "other") plus profit and loss before tax from discontinued operations.

C: the value is suppressed for confidentiality reasons.

¹⁾ Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

²⁾ Figures reported are year-to-date.

³⁾This includes, among other items, gains or losses resulting from the valuation of financial assets/liabilities at fair value, where those financial assets/liabilities are not reported as "held for trading".

⁴⁾ Operating income before administrative expenses and depreciation are deducted.

⁵⁾ Provisions include provisions for "commitments and guarantees given" and "other provisions".

⁶⁾ Profit and loss before tax from continued operations (i.e. "net income before impairment, provisions and taxes" + "impairment and provisions" + "other") plus profit and loss before tax from discontinued operations.

⁷⁾ There are no significant institutions at the highest level of consolidation in Croatia and Slovakia.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

³⁾ Figures reported are year-to-date.

⁴⁾ This includes, among other items, gains or losses resulting from the valuation of financial assets/liabilities at fair value, where those financial assets/liabilities are not reported as "held for trading".

⁵⁾ Operating income before administrative expenses and depreciation are deducted.

⁶⁾ Provisions include provisions for "commitments and guarantees given" and "other provisions".

⁷⁾ Profit and loss before tax from continued operations (i.e. "net income before impairment, provisions and taxes" + "impairment and provisions" + "other") plus profit and loss before tax from discontinued operations.

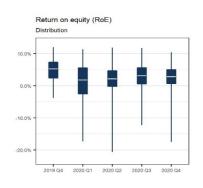

T02.02.1 Key performance indicators by reference period (percentages)

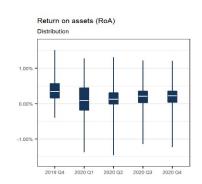

Indicator 1) 2)	Q4 2019	Q1 2020	Q2 2020	Q3 2020	Q4 2020
Return on equity (RoE)	5.16%	1.21%	0.01%	2.12%	1.53%
Return on assets (RoA)	0.36%	0.08%	0.00%	0.13%	0.10%
Cost-to-income ratio (CIR)	65.84%	72.44%	67.61%	65.50%	66.03%
Cost of Risk (CoR) 3)	0.50%	0.66%	0.70%	0.64%	0.67%

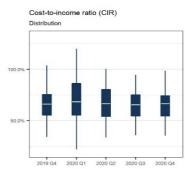

Source: ECB

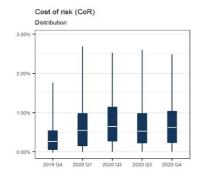

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. Specifically, there are 113 in the fourth quarter of 2019, 112 in the first and second quarter of 2020, 110 in the third quarter of 2020 and 112 in the fourth quarter of 2020. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis, and mergers and acquisitions.

- 1) RoE and RoA are computed by dividing "net profit/loss" by, respectively, "equity" and "total assets" at the end of the corresponding reference period. The values of "net profit/loss", originally year-to-date, are annualised to increase the comparability of the ratios across quarters.
- 2) Returns figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.
- 3) As set out in the list of definitions of ITS data points, the numerator of the cost of risk indicator is adjustments in allowances for estimated loan losses during the relevant period (annualised). Those adjustments may be negative in certain circumstances.

T02.02.2 Key performance indicators by country (percentages)

Source: ECB.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Computed as the difference between "total assets" and the sum of the other sub-categories.

³⁾ An asset is considered to be encumbered if it has been pledged or if it is subject to any form of arrangement to secure, collateralise or credit-enhance any transaction from which it cannot be freely withdrawn.

Other 4)	105.74	72.57	33.17
Total liabilities and equity	24,193.57	15,024.89	9,168.68

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ In line with IAS 37.10 and IAS 1.54(I).

³⁾ Computed as the difference between "total liabilities and equity" and the sum of the other sub-categories.

⁴⁾ Computed as the difference between "equity" and the sum of the other sub-categories.

Total non-domestic unallocated exposure 4)	54,995.56	57,327.33
Total exposure	3,141,919.99	3,017,763.74

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. In accordance with Article 5(b), point 3 of Regulation (EU) No 680/2014, reporting requirements apply to sovereign exposures where the aggregate carrying amount of financial assets from the "General governments" counterparty sector is equal to or higher than 1% of the sum of the total carrying amounts for "Debt securities" and "Loans and advances". Therefore, the sample of entities in the table is smaller than the full sample of entities. Specifically, there are 109 banks in the second and fourth quarter of 2020. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis, and mergers and acquisitions.

C: the value is suppressed for confidentiality reasons.

- 1) Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM). The figure for the second quarter of 2020 includes Bulgaria and Croatia.
- 2) European countries not in the EEA.
- 3) RoW: rest of the world, i.e. all countries except European countries.
- 4) Institutions whose non-domestic sovereign exposures are less than 10% of their total sovereign exposures are required to report the exposure at an aggregated level only.
- 5) This table is based on Template C 33.00.a. Institutions are required to report this template twice a year only, in the second and fourth quarters.
- 6) Following the establishment of close cooperation, Bulgaria and Croatia participate in the SSM as of 1 October 2020.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available; only the banks that have to comply with the sovereign exposures requirement are accounted in the table.

C: the value is suppressed for confidentiality reasons.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

²⁾ Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).

³⁾ European countries not in the EEA.

⁴⁾ RoW: rest of the world, i.e. all countries except European countries.

⁵⁾ Institutions whose non-domestic sovereign exposures are less than 10% of their total sovereign exposures are required to report the exposure at an aggregated level only.

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available. Specifically, there are 113 in the fourth quarter of 2019, 112 in the first and second quarter of 2020, 110 in the third quarter of 2020 and 112 in the fourth quarter of 2020. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis, and mergers and acquisitions.

1) CET1 stands for Common Equity Tier 1.

2) Total capital, Tier 1 and CET1 follow the transitional provisions laid down in Articles 465 to 491 of Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms (CRR).

- 1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

 2) Total capital, Tier 1 and CET1 follow the transitional provisions laid down in Articles 465 to 491 of Regulation (EU) No 575/2013 on prudential requirements for credit institutions
- and investment firms (CRR).
- 3) CET1 stands for Common Equity Tier 1.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

T03.04.1 Leverage ratio band by reference period

(number of institutions)

Indicator	Q4 2019	Q1 2020	Q2 2020	Q3 2020	Q4 2020

- 1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.
- 2) This category includes "corporates SME", "corporates specialised lending" and "corporates other".
- 3) This category includes "retail qualifying revolving", "retail other SME" and "Retail other non-SME".
- 4) This category includes "retail secured by real estate SME" and "retail secured by real estate non-SME".
- 5) CCP stands for central counterparty.
- 6) SA stands for standardised approach.
- 7) IM stands for internal model.
- 8) BIA stands for basic indicator approach.
- 9) TSA stands for traditional standardised approach. ASA stands for alternative standardised approach.
- 10) AMA stands for advanced measurement approach.
- 11) Includes "additional risk exposure amount due to fixed overheads", "total risk exposure amount related to large exposures in the trading book" and "other risk exposure amounts".
- 12) Risk weights are calculated as the ratio of the risk-weighted exposure amount to the total exposure amount. Not all exposure classes are presented in the table.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available; only the banks using Internal Rating Based approach to calculate their credit risk-weighted exposure amounts are accounted in the table. Where the conditions set out in Part Three, Title II, Chapter 3 of the CRR are met, the competent authority shall permit institutions to calculate their risk-weighted exposure amounts using the IRB approach. Specifically, there are 113 in the fourth quarter of 2019, 112 in the first and second quarter of 2020, 110 in the third quarter of 2020 and 112 in the fourth quarter of 2020. The number of entities per reference period reflects changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis, and mergers and acquisitions.

C: the value is suppressed for confidentiality reasons.

¹⁾ The countries shown in the table were selected based on the relevance of the aggregate exposure value of the SSM banks using the internal ratings based approach towards the obligors of those countries.

T05.02.3 Deposits to total funding ratio by classification (size)

(percentages)

Category (Q4 2020)	Deposits from credit institutions and other financial corporations to total funding	Deposits from non-financial corporations to total funding	Deposits from households to total funding
Banks with total assets			
Less than €30 billion	14.80%	17.45%	48.01%
Between €30 billion and €100 billion	20.26%	12.32%	35.96%
Between €100 billion and €200 billion	14.63%	16.34%	30.97%
More than €200 billion	17.14%	17.66%	34.14%
G-SIBs 1)	18.07%	19.99%	31.99%

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs as published by the Financial Stability Board.

T05.02.3 Deposits to total funding ratio by classification (risk-based) 1) (percentages)

Category (Q4 2020)	Deposits from credit institutions and other financial corporations to total funding	Deposits from non-financial corporations to total funding	Deposits from households to total funding
Banks with low risk	17.12%	17.69%	33.22%
Banks with medium, high risk and non-rated	18.87%	18.42%	33.58%

Source: ECB.

¹⁾ Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

Banks with largest non-domestic exposures			
SSM	-	5	55
Non-SSM EEA 2)	-	3	18
Non-EEA Europe ³⁾	-	-	3
RoW ⁴⁾	-	5	7
Total	-	13	99

Source: ECB.

- 1) Domestic exposures more than 95% of total debt securities and loans and advances.
- 2) Countries in the European Economic Area (EEA) not participating in the Single Supervisory Mechanism (SSM).
- 3) European countries not in the EEA.
- 4) RoW: rest of the world, i.e. all countries except European countries.
- 5) LCR stands for Liquidity Coverage Ratio.

T06.02.3 Liquidity coverage ratio band by classification (size)

(number of institutions)

Category (Q4 2020)	LCR ²⁾ ≤ 100%	100% < LCR ≤ 150%	LCR > 150%
Banks with total assets			
Less than €30 billion	-	2	23
Between €30 billion and €100 billion	-	3	45
Between €100 billion and €200 billion	-	1	11
More than €200 billion	-	5	14
G-SIBs 1)	-	2	6
Total		13	99

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) G-SIBs: global systemically important banks. Data based on the last available list of G-SIBs as published by the Financial Stability Board.

2) LCR stands for Liquidity Coverage Ratio.

Annex 01.01 Loans and advances subject to Covid-19 measures by reference period (EUR billions; percentages)

Indicator	Q2 2020	Q3 2020	Q4 2020
Total loans and advances 1)	14,377.13	14,173.74	13,773.43
of which: subject to expired COVID-19 measures 2)	90.53	360.13	592.86
